

**KEY:**

**INTERNAL WALLS:**

- Wall type 1 (0.0m FR and 0.0 RWB):** Refer to stud wall details.
- Wall type 2 (0.0m FR and 0.0 RWB):** Refer to stud wall details.
- Wall type 3 (0.0m FR):** Refer to stud wall details.
- Wall type 4 (0.0m FR):** Refer to stud wall details.
- Wall type 5 (0.0m FR):** Refer to stud wall details.
- Wall type 6 (0.0m FR):** Refer to stud wall details.
- Wall type 7 (0.0m FR):** Refer to stud wall details.
- Wall type 8 (0.0m FR):** Refer to stud wall details.
- Wall type 9 (0.0m FR):** Refer to stud wall details.
- Wall type 10 (0.0m FR):** Refer to stud wall details.

**INTERNAL DOORS:**

- To wall type 1:** Provide 10mm layer of Gyproc Finesse plasterboard with 10mm layer of 12.5mm Gyproc SoundBloc MR to wet room side of the wall.
- To wall type 2:** Provide 10mm layer of 12.5mm Gyproc Moisture resistant board in addition to the wall lining to wet room side of the wall.
- To wall type 3:** Provide 10mm layer of 12.5mm Gyproc Moisture resistant board to replace the wall lining to wet room side.
- To wall type 4:** Provide 10mm layer of 12.5mm Gyproc Moisture resistant board to replace the wall lining to wet room side.

**INTERNAL WINDOWS:**

- Window type 1 (1200x1500):** Provide 10mm layer of Gyproc Finesse plasterboard with 10mm layer of 12.5mm Gyproc SoundBloc MR to wet room side of the wall.

**EXTERNAL WALLS:**

- External wall type 1 (CERAMIC RAINSCREEN CLADDING):** Wall build up to achieve a value of 0.18W/m<sup>2</sup>K.
- External wall type 2 (COMPOSITE ALUMINIUM TERRACE FINISH CLADDING):** Wall build up to achieve a value of 0.18W/m<sup>2</sup>K.

**NOTE:** To internal partition walls care will be required by the contractor to ensure that any perpendicular crossers occur in the ceiling void, not in the wall.

**Wall linings to external perimeter walls:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**The below build-ups are to be applied to the secondary steelwork:**

- To wall type 1:** Provide 10mm layer of Gyproc Finesse plasterboard with 10mm layer of 12.5mm Gyproc SoundBloc MR to wet room side of the wall.
- To wall type 2:** Provide 10mm layer of 12.5mm Gyproc Moisture resistant board in addition to the wall lining to wet room side of the wall.
- To wall type 3:** Provide 10mm layer of 12.5mm Gyproc Moisture resistant board to replace the wall lining to wet room side.
- To wall type 4:** Provide 10mm layer of 12.5mm Gyproc Moisture resistant board to replace the wall lining to wet room side.

**Roofing:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Roof Slab:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Slab:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Slab Opening:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Slab Edge:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Slab Joint:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Slab Detail:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Slab Edge Detail:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Slab Joint Detail:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Slab Detail:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Slab Edge Detail:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Slab Joint Detail:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Slab Detail:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Slab Edge Detail:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Slab Joint Detail:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Slab Detail:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Slab Edge Detail:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.

**Slab Joint Detail:**

- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
- Provide secondary steel to structural engineer details and specifications with British Optimum 10mm Gyproc MR to wall side of wall.
